Mr. Shawn D. Davis  
Construction/Reclamation Engineer  
Barrick Mecur Gold Mine  
P.O. Box 838  
Tooele, Utah 84074

Dear Mr. Davis:

Subject: Final Construction Summary and QAQC Test Results-Reservation Canyon Tailings Impoundment

We have reviewed the Final Construction Summary and QAQC Test Results concerning the subject project prepared by Barrick Resources and GARCO Testing Laboratories respectively. We received this information on April 9, 1996.

The Construction Summary describes all of the construction activities and status of the tailings impoundment.

The QAQC report contains field and laboratory test results compiled during the construction of the facility. All liner panels were tested and showed a permeability of less than  $4 \times 10^{-8}$  cm/sec, which is less than the permeability limit ( $1.0 \times 10^{-7}$  cm/sec) stated in the construction permit.

Submission of this material satisfies the requirements of the construction permit.

Sincerely,

Kiran L. Bhayani, P.E., D.EE.  
Manager, Design Evaluation Section
